

KEY BENEFITS

Practical information is recorded during the initial equipment set up process.

- Interval or meter count between preventive maintenance activities
- Picture of equipment
- Spare parts required
- Instructions on how to maintain the equipment
- Custom fields that are user defined
- The due dates for equipment maintenance can skip user-identified periods

“Preventive Maintenance Software”

MAJOR FEATURES

Reporting:

The criteria for identifying the equipment to be included in the selected report are user determined. Filtering and ordering the report can be based on:

- Date range or overdue
- Equipment ID, Category, Location
- User defined fields

Equipment Maintenance Reports:

- Work order with maintenance instructions
- Equipment due for maintenance list
- Calendar highlighting scheduled maintenance days
- Equipment Maintenance History
- Maintenance efficiency analysis
- Spare parts inventory

Multi language support

Only ₹ 10,000/- per year
